

Department of the Navy, DoD

§ 775.5

§ 775.4 Responsibilities.

(a) The Assistant Secretary of the Navy (Installations and Environment) (ASN (I&E)) shall:

(1) Act as principal liaison with the Office of the Secretary of Defense, the Council on Environmental Quality, the Environmental Protection Agency, other Federal agencies, Congress, state governments, and the public with respect to significant NEPA matters.

(2) Direct the preparation of appropriate environmental analysis and documentation and, with respect to those matters governed by SECNAV Instruction 5000.2 series, advise the Assistant Secretary of the Navy (Research Development and Acquisition) (ASN (RD&A)) concerning environmental issues and the appropriate level of environmental analysis and NEPA documentation needed in any particular circumstance.

(3) Except for proposed acquisition-related actions addressed in paragraph (b)(2) of this section, review, sign, and approve for publication, as appropriate, documents prepared under NEPA.

(4) Establish and publish a list of categorical exclusions for the DON.

(b) The Assistant Secretary of the Navy (Research, Development and Acquisition) (ASN (RD&A)) shall, in accordance with SECNAV Instruction 5000.2 series:

(1) Ensure that DON acquisition programs, research programs, and procurements comply with NEPA.

(2) Review, sign, and approve for publication, as appropriate, environmental documents prepared under NEPA for proposed acquisition or research and development related actions.

(c) The General Counsel of the Navy and the Judge Advocate General of the Navy shall:

(1) Ensure that legal advice for compliance with environmental planning requirements is available to all decision-makers.

(2) Advise the Secretary of the Navy, the Chief of Naval Operations, and the Commandant of the Marine Corps as to the legal requirements that must be met, and the conduct and disposition of all legal matters arising in the context of environmental planning.

(d) The Chief of Naval Operations (CNO) and the Commandant of the Marine Corps (CMC) shall:

(1) Implement effective environmental planning throughout their respective services.

(2) Prepare and issue instructions or orders to implement environmental planning policies of the DON. Forward proposed CNO/CMC environmental planning instructions or orders to ASN (I&E) and, when appropriate, ASN (RD&A) for review and comment prior to issuance.

(3) Make decisions on environmental assessments as to whether a Finding of No Significant Impact is appropriate or preparation of an environmental impact statement is required.

(4) Ensure that subordinate commands establish procedures for implementing mitigation measures described in NEPA documents.

(5) Provide coordination as required for the preparation of NEPA documents for actions initiated by non-DON/DOD entities, state or local agencies and/or private individuals for which service involvement may be reasonably foreseen.

(6) Bring environmental planning matters that involve controversial issues or which may affect environmental planning policies or their implementation to the attention of ASN (I&E) and, where appropriate, ASN (RD&A) for coordination and determination.

(7) Notify ASN (I&E), and when appropriate, ASN (RD&A) of any proposed EIS, and of any EA that may involve potentially sensitive public interest issues. EIS notification shall occur prior to commencing NEPA document preparation or receiving any public or regulatory agency involvement. EA notification shall be made as soon as it becomes apparent that potentially sensitive public issues are involved.

[69 FR 8109, Feb. 23, 2004]

§ 775.5 Classified actions.

(a) The fact that a proposed action is of a classified nature does not relieve the proponent of the action from complying with NEPA and the CEQ regulations. Therefore, environmental documents shall be prepared, safeguarded

and disseminated in accordance with the requirements applicable to classified information. When feasible, these documents shall be organized in such a manner that classified portions are included as appendices so that unclassified portions can be made available to the public. Review of classified NEPA documentation will be coordinated with the Environmental Protection Agency (EPA) to fulfill requirements of section 309 of the Clean Air Act (42 U.S.C. 7609 *et seq.*).

(b) It should be noted that a classified EA/EIS serves the same “informed decisionmaking” purpose as does a published unclassified EA/EIS. Even though the classified EA/EIS does not undergo general public review and comment, it must still be part of the information package to be considered by the decisionmaker for the proposed action. The content of a classified EA/EIS (or the classified portion of a public EA/EIS) will therefore meet the same content requirements applicable to a published unclassified EA/EIS.

§ 775.6 Planning considerations.

(a) An EIS must be prepared for proposed major Federal actions that will have significant impacts on the human environment. The agency decision in the case of an EIS is reflected in a ROD.

(b) Where a proposed major Federal action has the potential for significantly affecting the human environment, but it is not clear whether the impacts of that particular action will in fact be significant, or where the nature of an action precludes use of a categorical exclusion, an EA may be used to assist the agency in determining whether to prepare an EIS. If the agency determination in the case of an EA is that there is no significant impact on the environment, the findings will be reflected in a FONSI. If the EA determines that the proposed action is likely to significantly affect the environment (even after mitigation), then an EIS will be prepared. An EA also may be used where it otherwise will aid compliance with NEPA.

(c) CEQ regulations (40 CFR 1508.18(a)) define major federal actions subject to evaluation under NEPA to include, among other things, “new and

continuing activities”. The term *new activities* is intended to encompass future actions, *i.e.*, those which are not ongoing at the time of the proposal. The term *continuing activities* which may necessitate the preparation of a NEPA document will be applied by the Department of Navy to include activities which are presently being carried out in fulfillment of the Navy mission and function, including existing training functions, where:

(1) The currently occurring environmental effects of which have not been previously evaluated in a NEPA document, and there is a discovery that substantial environmental degradation is occurring, or is likely to occur, as a result of ongoing operations (e.g., a discovery that significant beach erosion is occurring as a result of continuing amphibious exercises, new designation of wetland habitat, or discovery of an endangered species residing in the area of the activity), or

(2) There is a discovery that the environmental effects of an ongoing activity are significantly and qualitatively different or more severe than predicted in a NEPA document prepared in connection with the commencement of the activity.

A substantial change in a continuing activity (such as a substantial change in operational tempo, area of use, or in methodology/equipment) which has the potential for significant environmental impacts should be considered a proposal for a new action and be documented accordingly. Preparation of a NEPA document is not a necessary prerequisite, nor a substitute, for compliance with other environmental laws.

(d) Where emergency circumstances require immediate action, for the protection of lives and for public health and safety, which could result in significant harm to the environment, the activity Commanding Officer or his designee shall report the emergency action to CNO (OP-44E)/CMC (LFL) who will facilitate the appropriate consultation with CEQ as soon as practicable.

(e) A categorical exclusion (CATEX), as defined and listed in this regulation, may be used to exclude a proposed action from further analysis. Even though a proposed action generally is
